JOINT MISSION COVERAGE INDEX

Mission C 6054

5 April 1960

PREFACE

This index contains chart-form listings of intelligence items by WAC number accompanied by the appropriate WAC. The index is arranged according to flight line starting with the lowest-numbered exposure and proceeding to the highest. Deviations from this order occur when a particular flight zigzags in and out of several adjoining WACs. In addition to a chart listing, the intelligence items are listed alphabetically by subject.

An explanation of the chart-form headings is contained in the appendix.

SUMMARY OF COVERAGE OF MISSION

Mission C 6054 was flown 5 April 1960 using the B configuration. The mission covered areas of Communist China and Burma extending from Kun-ming, Yunnan Province, China, north to Cheng-tu and the Lan-chou area, thence west across Koko Nor, southwest to the Golmo area, then east across Tsinghai Province and finally south to Mu-se on the China-Burma border. Over-all cloud cover was approximately 20 percent, with the heaviest concentration over Kun-ming. Major items of intelligence interest were in the Cheng-tu area where recent industrial expansion, including a new aircraft plant, was in evidence, and a Bull-type aircraft was noted.

APPENDIX

Explanation of Chart-Form Headings

The chart-form listing contains the following entries (paragraphs are numbered to correspond with column headings on the chart forms):

1. PIC Target Number: PIC Target numbers are comprised of two elements: (1) the WAC number for the area in which the target lies, and (2) a numerical designation (occasionally followed by a capital letter) for the specific target within that WAC area, i.e., 246-006 designates target number 6 in WAC 246.

In addition to being listed in the text, targets are plotted on the pertinent WACs in this report.

2. Name of Installation: The name will be given, if known. If not, the installation will be titled according to an associated geographic name or according to obvious use, such as storage area, instrumentation station, etc.

3. Description and BE Number: Descriptions of installations listed will be brief and consist basically of changes since previous coverage. BE numbers will be given when they exist.

4. Exposure Numbers and Grid Reference: If more than two exposures cover the installation, only two exposures will be listed, usually those providing the best stereo coverage. Following exposure numbers will be the grid reference, a letter and number combination, within parentheses, designating the position of the item on the first frame listed. Extensive installations, such as a test range or large urban area, do not carry a grid reference.

5. Camera Position: Mission C 6054 was flown with the B configuration. The position of Camera 9 on the two exposures listed under 4, above, will be noted. (V - vertical; 1L - first oblique, left side; 2L - second oblique, left side; 3L - third oblique, left side; 1R, 2R, 3R - first, second, third oblique, right side.)

6. Total Exposures: This figure will indicate the total number of exposures that cover the installation even though only two exposures are listed in the preceding column.

7. Cloud Information: This letter designation indicates cloud conditions as they exist over the listed installation. The letter designations are as follows:

C	Clear
SC	Scattered Clouds
HC	Heavy Clouds
O	Overcast
H	Haze (includes smoke, blowing snow and dust)
CS	Cloud Shadow (cloud shadows cast on ground reducing interpretability)

8. Subject Code: Thirteen categories are used; they are as follows:

- 1 Airfields
- 2 Atomic Energy
- 3 Electronics and Telecommunications
- 4 Industry
- 5 Liquid Fuels
- 6 Military Installations
- 7 Missiles
- 8 Naval Installations
- 9 Ports and Harbors
- 10 Storage Facilities, General
- 11 Transportation
- 12 Urban Areas
- 13 Miscellaneous

9. Coordinates: Coordinates are given to the nearest minute for the approximate center of the installation.

10. Country: The country is designated by the two letter code used in the Bombing Encyclopedia.
